EXPERIENCE

Crowe LLP

Federal Tax Consulting Intern

June 2026 – Aug. 2026

Atlanta, GA

- Performed IRC Section 481(a) adjustment calculations for accounting method changes and Section 263A (UNICAP) cost allocation analyses, reconciling capitalized costs to underlying client records.
- Supported cost segregation studies using Bluebeam to identify and classify construction assets for accelerated depreciation under MACRS, generating material tax savings opportunities across client engagements.
- Prepared Form 3115 (Application for Change in Accounting Method) workpapers and compiled Depreciation Change Notifications (DCNs), validating fixed asset schedules, prior-year returns, UNICAP adjustments, and deferred revenue data.
- Built a custom GPT to automate attachment guide preparation for DCN and Form 3115 filings, standardizing document requirements and reducing manual research time across accounting method change projects.
- Conducted federal tax research using Blue J AI and Bloomberg Tax to analyze current and historical regulations supporting client-specific accounting method and depreciation positions.
- Developed Excel-based depreciation schedules and variance analyses incorporating bonus depreciation elections and Section 179 carryover calculations for client deliverables reviewed by senior managers.
- Validated and reconciled large fixed asset datasets by cross-referencing source documents to identify and resolve discrepancies prior to final submission.
- Drafted client-facing deliverables including executive summaries, asset classification memos, and depreciation reconciliation schedules; coordinated submissions under manager review.
- Documented key discussion points, open items, and action steps from client calls and internal meetings to maintain project continuity and accountability.

Cheung Kong Holding Inc.

Accounting & HR Assistant (Seasonal)

Summer 2020 – Summer 2025

Atlanta, GA

- Recorded, reviewed, and reconciled 1,000+ transactions per season—including check deposits, cash receipts, vendor disbursements, and intercompany transfers—against source documents and resolved discrepancies to maintain accuracy across financial records.
- Prepared period-over-period balance schedules and variance explanations to support management decision-making and planning.
- Processed payroll inputs, maintained employee compensation files, verified approvals, and retained required documentation in compliance with recordkeeping standards.
- Supported accounting operations for a multi-location business with employees and vendors across the United States and Southeast Asia; maintained organized supporting files for internal reporting.
- Tracked tax-related payables (payroll and sales tax) and maintained a payment due-date log to ensure timely accrual entries and avoid filing penalties.

Kumon Learning Center

Tutor & Data Entry Assistant

2022 – 2023

Johns Creek, GA

- Tutored students in math and reading comprehension, tailoring instructional approach based on individual progress data to improve learning outcomes.
- Analyzed weekly and monthly progress trends to identify performance outliers and provided instructors with actionable insights for curriculum adjustments.
- Managed academic performance records for 300+ students using structured Excel tracking systems; conducted regular audits to maintain data integrity and correct entry errors before period-end reporting.

PROJECTS

Algorithmic Market Screener | *Python, yfinance, JavaScript, GitHub Actions, Data Analysis* 2025 – Present

- Built a rule-based equity screener ranking a tracked stock universe and surfacing weekly top-3 candidates using momentum, RSI, and volume signals with walk-forward methodology to eliminate look-ahead bias.
- Pulled real-time and historical market data via Yahoo Finance (yfinance) and backtested a \$1,000 portfolio strategy against personal holdings and the Nasdaq-100 (QQQ) benchmark, documenting return calculations and signal performance.
- Automated a monthly data pipeline via GitHub Actions to regenerate performance outputs and publish strategy-comparison results to a personal finance website for live portfolio tracking.

Independent Resale & Investing | *Excel, Financial Modeling, Market Analysis* 2020 – Present

- Built and managed a personal equity portfolio up 300% year-to-date, with documented return calculations, investment theses, and entry/exit rationale for each position.
- Generated \$33K+ in cumulative sales through resale of trading cards, consumer electronics, and footwear by identifying arbitrage opportunities through systematic pricing and demand analysis across platforms.
- Maintained a detailed Excel ledger tracking revenue, COGS, platform fees, shipping costs, and net profit by product category and time period to evaluate capital allocation efficiency and margin by line.

Personal Finance Website & Blog | *HTML, CSS, JavaScript, Spotify API* 2024 – Present

- Designed and deployed a personal website publishing weekly market commentary and stock picks with documented rationale; tracked win/loss ratio across all calls and displayed cumulative return a \$1,000 follower would have generated.
- Integrated the Spotify API to display currently playing music in real time, with an automatic refresh every 30 seconds to reflect live listening activity on the site.
