EXPERIENCE

Chueng Kueng Holding Inc

Atlanta, GA

Accounting & HR Assistant (Seasonal)

Summer 2020 – Present

- Recorded, reviewed, and organized 500+ transactions per season, including check deposits, cash receipts, vendor disbursements, and intercompany transfers.
- Supported accounting operations for a multi-location business with employees and vendors across the United States and Southeast Asia; maintained clear supporting documentation for internal reporting.
- Reconciled inventory and transaction records to supporting documents and resolved discrepancies to improve accuracy in internal summaries.
- Processed payroll inputs and maintained employee compensation files; verified approvals and retained required payroll documentation for recordkeeping.
- Prepared schedules showing how key balances changed from period to period and assembled backup used for management review and variance explanations.
- Assisted with basic accrual support by tracking tax-related payables (for example, payroll/sales-tax amounts due) and maintaining a due-date log.

Kumon Learning Center

Johns Creek, GA

Tutor & Data Entry Assistant

2022 – 2023

- Entered, verified, and maintained academic performance records for 300+ students using Excel-based tracking systems.
- Maintained weekly and monthly logs and corrected inconsistencies to keep reporting accurate across periods.
- Reviewed trends to identify outliers and support instructional planning.

PROJECTS

Independent Resale and Investing | *Excel, Financial Tracking, Market Analysis*

2020 – Present

- Generated \$33K+ in cumulative sales through resale of trading cards, consumer electronics, and footwear, analyzing pricing trends and market demand to inform purchase and sale decisions.
- Maintained a detailed Excel ledger tracking revenue, costs, platform fees, shipping, and net profit to monitor performance and support reconciliation.
- Recently expanded into personal equity investing; built and managed a stock portfolio generating approximately \$15K in cumulative gains while tracking performance and documenting investment rationale.
- Summarized results by product category and time period to evaluate profitability, capital allocation, and turnover efficiency.

Personal Portfolio & Finance Blog | *HTML, CSS, JavaScript*

2024 – Present

- Built and deployed a personal website to publish finance content using HTML/CSS/JavaScript.
- Posted monthly stock predictions one month in advance, then updated each post with results after the month ended (which picks went up/down) and a \$1,000 paper-portfolio simulation with performance charts.

Fish-Based Market Indicator System | *Python, OpenCV, Web Scraping, Market Data API*

2023 – 2024

- Built a Python project that turns a fish-tank camera feed into a simple daily stock-selection rule for a paper-trading simulation.
- Each day, scraped Reddit to identify the two most-mentioned tickers; assigned one ticker to the left side and the other to the right side using documented tie-break rules.

- Checked fish counts at three set times per day; if a side won 2 out of 3 checks, the model added \$75 to that ticker (positions held until the test ended).
- Pulled end-of-day prices using a free market data API to calculate daily gain/loss and update portfolio value; logged missing data and non-trading days.
- Saved daily selections, observations, and valuation outputs to a CSV for traceability and review.
